◆ UCF REPORT

Volume 11, Number 21

For Faculty and Staff

April 19, 1989

STEVEN ALTMAN--

BOR choice to lead UCF

FIRST in the state university administrative system, Chancellor Charles B. Reed, was first to congratulate Dr. Steven Altman, soon-to-be first in UCF's administrative system, on surviving the long selection process and emerging from a distinguished field as UCF's next president.

IST gets \$5 million grant for worldwide simulation

UCF's Institute for Simulation and Training has been awarded a \$5 million contract by the Defense Advanced Research Planning Agency to conduct research on networking simulators for training.

The two-year project will focus on the development of methods and hardware that will enable various kinds of simulators and training devices to participate in training exercises simultaneously. Eventually, armored units, aircraft and ground troops will "fight" on the same simulated battlefield whether they are across the state or on different continents.

This "tactical team training" approach permits the interaction of crews from the different services and allows them to perfect skills that are too dangerous or impossible to practice outside of actual combat and at a considerable savings of money and resources.

Another aspect of the Simulator Networking (SIMNET) project is the development of intelligent/interactive simulated enemy forces. These computerized forces will permit greater realism and flexibility in developing training exercises, including varying levels of difficulty, without having to train large numbers of personnel in opposing force tactics.

To support the advanced research necessary to integrate these various elements for the worldwide SIMNET project, IST and UCF will serve as the "academic node" or focal point for this effort.

Work on the project will include participation by the State University System and other colleges and universities throughout Florida and the nation. The multidisciplinary structure of IST will facilitate the processing and sharing of information acquired through SIMNET research with these other academic institutions, as well as industry and government units involved in simulation and training.

The SIMNET project is managed by the Army's Project Manager for Training Devices (PM TRADE) located at the Naval Training Devices Center, Central Florida Research Park.

Brian Goldiez is project manager for IST and Ernie Smart the project coordinator.

Smart indicated approximately 30 faculty and students will be involved in the project at some point. Most will be from UCF, but others will be chosen from other SUS universities and some from out-of-state, "wherever we find the expertise," he said.

Texas A&I's president, Steven Altman, will show up on campus a couple more times before July, when he expects to become a Florida resident again, preparing to assume the role of UCF's third president.

Just showing up without formal announcement is a style he said he has practiced in the past and expects to continue at UCF. He also said he wants to meet regularly with student leaders and representatives of other constituencies on campus.

Reviews of all academic and research programs are what employees of UCF can expect in the first 100 days of the new administration.

Holding precisely to the schedule set last November, Florida's Board of Regents ended the suspense last Friday, naming Altman, 43, to the \$121,000-a-year leadership of the State University System's fourth largest of nine state universities.

By the final day other leading candidates had withdrawn, except for Altman and Roy McTarnaghan, SUS vice chancellor for academic affairs. The process required that Chancellor Charles B. Reed nominate his choice, then the BOR's Presidential Selection Committee voted on it, and finally, the full Board of Regents made the choice official. Only the committee and BOR chairman, Joan Ruffier, and UCF student regent, Jackie Goigel, were present in person at the President's Dining Room. The others attended by a conference call that included a speaker phone at the chairman's table. The vote taken, Ruffier adjourned the meeting, a signal for Altman to appear for a standing ovation.

Altman responded by saying, "You are not as happy as I am to be here."

In brief remarks before posing for photographs and answering reporters' questions, Altman pledged, "We are going to build a great university here. It is already so well poised. I hope the faculty share my high level of aspirations."

A native of Jacksonville, who earned his three degrees in California, Altman made his mark at Florida International University by rising from chairman, Division of Management, in 1972, through interim assistant vice president for Academic Affairs, associate vice president,

vice president and finally provost. He held the last position from 1982 until 1985 when he was picked to head the 5,000-student university at Kingsville in South Texas.

A continuous record of success, plus a calm and confident manner through successive interviews, led to his selection out of a field that started with 165 persons who either applied for, or were recommended, to succeed Trevor Colbourn in August. At that time Colbourn's tenure as president will have lasted 11 years. After a sabbatical, Colbourn plans to return to teach and do research in his field of history.

Colbourn's successor earned a BA in mathematics at UCLA in 1967 and followed it with an MBA at the University of Southern California in 1969. He earned his DBA at Southern Cal in management and quantitative methods in 1975.

He joined the USC faculty in 1969 as a lecturer and was assistant dean, School of Business, when he left in 1972 to become an assistant professor of management and chairman of the Division of Management of the College of Business Administration at FIU. By the time he had moved up to full professor in 1984, Altman had already been FIU's provost for two years.

One of the points he made to questioning reporters last Friday is that he authored eight books, keeping up his professional research, while maintaining a full administrative schedule. He was chosen for an excellence in teaching award at Southern Cal, was chosen by Student Government at FIU for an outstanding faculty member award, was named labor educator of the year at Miami, made the list of outstanding young men in America and Who's Who in America, among a number of achievements listed in his vita.

He has served as an appointed member of the National Panel of Labor Arbitrators, American Arbitration Association since 1977. His success in representing FIU's interests at the legislature is another factor that weighed in his choice to lead UCF.

He has served as the president of chambers of commerce, at South Miami-Kendall area, and at Kingsville.

His wife, Judy, is from California.

SYMBOLS—Goigel, Ruffier & President-designate Altman

Grant Opportunities

Grants Development distributes research opportunities directly to faculty through the use of our faculty profile system. If you are not receiving information from our office on a regular basis, it may be because you are not on our system. Please contact Grants Development as soon as possible if you suspect this is the case.

"RESEARCH CAREERS FOR MINORITY SCHOLARS" (NSF) - The RCMS program provides grants to colleges and universities to assist in the implementation of comprehensive research and academic enrichment programs for minority undergraduate and graduate science and engineering students. Due 6-15-89.

"CANCER PREVENTION AND CONTROL RESEARCH SMALL GRANTS PROGRAM" (NIH) - This program is designed to aid and facilitate the growth of a nationwide cohort of scientists with a high level of research expertise in the field of human cancer control intervention research. Due 5-5-89.

"EXTRAMURAL RESEARCH SUPPORT PROGRAMS" (HHS) - The National Institute of Mental Health supports research and research training programs to increase knowledge and improve research methods on mental and behavioral disorders; to generate information regarding basic biological and behavioral processes underlying these disorders and the maintenance of mental health, and to develop and improve mental health services, including prevention and treatment. Due 5-10-89 & 6-1-89.

"AN ILLUMINATED WORLD" (LIGHTING RESEARCH INSTITUTE) - LRI is interested in funding lighting research, funding lighting education, implementing lighting industry needs and priorities, and improving the general public's understanding of light's contribution to the quality of life. Due 6-15-89.

Broad Agency announcements available:

"ADVANCED REFRACTORY THIN FILM COATING MATERIALS AND DEPOSITION PROCESSES" (NAVAL WEAPONS CENTER) - Due 5-26-89.

"BASIC RESEARCH IN METAL ION BIOSENSORS": (OFFICE OF NAVAL RESEARCH) - Due 6-1-89.

For further information please call Grants Development at x2671.

Tucker gets award for Threshold work

The annual Threshold Run for the Kids and its founder and director, Dick Tucker, have come into some unexpected recognition. Tucker, chair of Psychology, received a letter informing him that he should attend an April 26 reception in Orlando to receive one of the ten finalist J.C. Penney Golden Rule Awards, that include a \$250 cash prize.

Unknown to him, friends at Threshold Inc., the school for autistic and other behaviorally dysfunctional children, had submitted his name. He had helped found the school in 1976 and staged the annual races on campus that have raised more than \$100,000 for the school over the years.

POTTERY SALE

Pottery made by students since the first of the semester will be displayed and sold on the Green near the Student Center on Wednesday, April 19, from 10 a.m. until 3 p.m.

Official Memoranda

Publication of these memoranda and announcements about University policy and procedure constitutes official notice to faculty and staff

To: All Employees
From: John R. Bolte, Vice President
Administration and Finance
Subject: Alterations and Improvements

When it is necessary to have repair, installation, or remodeling work done in any campus location assigned to your department, the proper form for authorization is the Alterations and Improvements form (A&I). Upon receipt of the form, Mike Spinnato, the A&I administrator, will insure that all codes and conditions are met and that necessary approvals are obtained from controlling agencies and departments. Individual administrators are not authorized to contract for work of any kind without these approvals. The A&I may be used to receive a price quote before giving a final okay for completion of the work or to have the work approved and scheduled without a preliminary quote. When jobs are to be bid by Purchasing, the A&I administrator will coordinate with appropriate departments to develop specifications.

No work may be done at any campus location unless the above procedure is followed. The Physical Plant and Facilities Planning staffs are available to assist you in every way possible. Please feel free to contact them before you proceed or if you have any questions.

To: All Departments
From: Jack Winstead
Director of Purchasing
Subject: Requisitions for Blanket Orders

The Purchasing Division is anticipating having the capability of entering purchase orders into the terminal in advance of the forthcoming fiscal year. All orders entered will be stored and subsequently issued to vendors shortly after July 1, 1989.

Requisitions requesting the issuance of Blanket Acquisition Orders for commodities/services as per a State or UCF Contract, Blanket Purchase Agreements and Blanket Maintenance Agreements for the period July 1, 1989 - June 30, 1990 should be submitted to Purchasing at this time.

To assist you in properly filling out your requisitions for these blanket orders, we have developed standardized formats for each type of order mentioned above. Please call x2661 for copies of these formats, or pick them up at the front desk in Room 360, Admin Building.

All subject requisitions must be headed with the following statement:

FISCAL YEAR 1989-90 REQUISITION

Thank you for your cooperation.

To: All Departments
From: Bill D. Morris, Director
Administrative Services
Subject: Access Charge Increase

On Oct. 16, 1988 the Public Service Commission granted Southern Bell a major increase in their charge for access to their network -- the network that we use for any calls going off campus. For the University this will be an annual increase of \$25,920. To recover this increase the charges per telephone will be increased \$1.00 per month starting July 1, 1989.

To: All Faculty and Staff
From: Ruth Colquitt, Supervisor
Telecommunications
Subject: State of Florida (SUNCOM) Directories

The State of Florida directories are available for distribution April 19 to April 28.

Departments can have their 1989 directories picked up at Telecommunications, Library 143, between 9 a.m. and 4 p.m., Monday through Friday.

If you have further questions please call Lanora Alderman at x2802.

To: Faculty
From: Barth Engert, Chair
AD158, x2842
Subject: Spring Commencement Procession

Spring commencement ceremonies will be held in the Gymnasium on Tuesday, May 9 as follows:

8 a.m.	Education & Engineering
11 a.m.	Arts & Sciences
2:30 p.m.	Business, Health & Liberal Studies

Faculty will assemble in the corridor to the right of the Gymnasium entrance, in academic regalia, 30 minutes prior to their college's ceremony.

Following the benediction, the recessional will proceed to the reception area.

The snack bar in the Education Building lobby will open at 7 a.m.

Student planned convention scores success for hospitality

The student chapter of the Hotel Sales and Marketing Association International completed a two-year project earlier this month that their faculty advisor, Audrey McCool, declared "a tremendous success that brought a lot of recognition for our students and our program at UCF."

Their long-planned and carefully executed project was the hosting of an annual convention for 40 different U.S. schools with hospitality management programs. It attracted 300 students and involved professional speakers from Orlando area tourist attractions, hotels, public relations and restaurants.

The student convention was held in three different locations, the Orlando Hyatt, Walt Disney World Contemporary Resort and the Orange County Convention Center. The convention provided educational sessions in the work environment, plus an opportunity for students to network with people who can help them enter careers in hospitality management, McCool said. The students heard talks from Paul Astleford, vice president for reports, sales and marketing for Walt Disney World; Warren Beaux, assistant vice president for worldwide sales, Hyatt Corporation; Peter Yesawich, president of Robinson, Yesawich and Pepperdine; Dennis Lesko, director of marketing, Marriott Worldwide Center; Ralph Rodriguez, director of sales for SeaWorld, plus many others who spoke to smaller

groups in specialized sessions.

Planning the convention became part of the course work for the 50 members of the UCF chapter. Florida Restaurant Association provided support for Robert Ashley's food production class that prepared the opening day reception.

McCool concluded that UCF students gained a lot of self-recognition from potential employers, who also were favorably impressed with what the UCF hospitality management program was able to produce in the way of a successful convention.

Hearing course offered at center

The Colleges of Extended Studies and of Health will offer the course, Hearing Conservation, at the UCF-Winter Park Center, Lee Road and US Highway 17-92, Friday through Sunday, May 5-7.

The course is approved to meet requirements for continuing education needs of many professions in Florida.

It is possible to attend only the Saturday session if the refresher course, or a limited number of continuing education hours, is required. One must attend the entire course, however, to be certified as a hearing conservationist (audiometric technician). Call Extended Studies, x2123, for information.

Health presents fair at Florida Mall

The College of Health, in cooperation with the UCF/South Orlando campus, will present Health Fair 1989 at the Florida Mall, Beeline and Orange Blossom Trail, on Saturday, April 22.

The College of Health will be represented by Health, Radiologic, Medical Laboratory and Cardiopulmonary Sciences, Nursing and Medical Records Administration. There will be 21 other exhibitors from health related professions, Thomas S. Mendenhall, interim associate dean, announced.

Area hospitals, clinics and numerous voluntary health agencies will have exhibits. The fair will be open between 10 a.m. and 9 p.m., providing health information to the public and informing students of career opportunities in health related fields.

Workshop views sexual harassment

A workshop on prevention of sexual harassment will be presented at the UCF Winter Park Center on Friday, April 21, from 9 a.m. until noon. Sponsored by UCF's College of Extended Studies, the workshop will be led by Dr. Thomas Mullin, College of Health associate professor.

Topics will include state and federal law, EE/OC guidelines, company policy statements, supervisory and management responsibilities. The cost is \$60. For information call 645-0310.

Campus construction heading for new high

A design development meeting has been scheduled for today between University officials and architects to nail down details of the \$8.8 million fieldhouse and track, one of several construction jobs in the works. Sited northeast of Pegasus Circle in an undeveloped part of the campus, the fieldhouse and track have a completion deadline of April 25, 1991.

There was a meeting on campus last

week so architects could disclose a conceptual design for a \$7.48 million Arts Complex to be located between the Education Building and Gemini Boulevard. The timetable calls for bid letting in February 1990 with 16 months for construction.

Earlier this month, the State University System and UCF Facilities Planning Director Jerry Osterhaus agreed to retain Ray Johnson & Associates of Or-

lando to design the \$788,000 remodeling of Howard Phillips Hall. The architects must have construction documents ready for a November 1989 bidding.

Phillips Hall will soon be vacated by the College of Business Administration as it moves into its new home, CEBA II.

May 3 is closing date for architects who will submit proposals for the remodeling of the Chemistry Building, funded in 1988-89 in the amount of \$1.1 million and for \$1.725 million additional in 1991-92.

Campus and SUS architects have been negotiating with Scott & Company of Maitland to design a Student Union Building at a location still not settled to the satisfaction of all campus constituencies. A site on Driggers' Field met objections of those who wish to perpetuate the memory of the late Troy Driggers, UCF's first drum major. The field is also used by the marching band for practice and ROTC cadets for drilling.

The Student Center has been budgeted at \$2,353,000 from the bond sale pledging student fees. Terms of the bond sale require the money to be spent by April 1991, the same as the fieldhouse.

This week the final architect's design is due for taking bids on the Campus Security Facility, the half million dollar permanent home for the campus police, to be located near Physical Plant.

Another new building, the \$200,000 Chemicals Storage Building, is nearing completion in back of Physical Plant. When finished it will be the place for all delivery, storage, distribution, collection after usage and final disposal for chemicals that come on campus.

Concurrently with planning of fieldhouse and track is a new road that will start from Alafaya Trail further to the north than any prior access to campus, passing through the parking lot for the Lake Claire recreation site and opening the new territory to the east, passing the fieldhouse and track in an eventual new outer circuit of the campus core.

A three-lot extension of Greek Park is tentatively planned between the present Greek Park Drive and Alafaya Trail, with access off the new road. Greek chapters have already declared they want the lots to build on-campus houses.

At the UCF/Brevard Community College campus in Cocoa, Architects Design Group and associates have prepared the advanced schematic design for a Florida Solar Energy Center, relocated immediately north of the Lifelong Living Center. The plans call for a \$7.4 million facility, but plans will be on hold until funding is approved.

"Never in the 25 year history of the University has there been so much building activity all at one time," Osterhaus observed.

Summer softball leagues organize

Recreational Services will hold an organizational meeting for UCF Summer Softball League at the Rec Services Pavilion on Monday, April 24, at 6 p.m.

Organizers and players will discuss the number of divisions, playing days and rules. In the past there have been two levels of men's play and a coed league for maximum participation.

UCF faculty and staff are invited.

Golf tourney to aid engineering student

Mid Florida Utility Contractor's fifth annual spring golf tournament will raise money for a College of Engineering scholarship.

Play will be at the West Orange Country Club on Tuesday, May 15, with a shotgun teeoff at 1 p.m., to be followed by a barbeque at 5:30 p.m. Golf and BBQ runs \$50; BBQ only \$10.

Staff Council's BIRTHDAY REPORT

With this issue of The UCF Report, the Staff Council responds to a repeated request from staff employees who would like to see each person's birthday acknowledged before the event. This monthly listing is an extension of a policy to recognize birthdays by sending cards to the celebrant. If anyone wishes to have their name omitted from future listing, please call Joanne Ogburn at x5181.

MARGARET G. MILLER

Margaret Miller is new director of COEd center

Margaret G. Miller, associate professor of special education in the College of Education, has been appointed the director of the Extended Studies and Teacher Education Center, effective in August, Dean William H. Johnson announced.

Miller has been on faculty since 1985 and for the two years prior to that she served as the associate superintendent for personnel and office services, Orange County Public Schools.

Miller earned BS and MS degrees from Indiana State University, majoring in music and speech, speech education and speech therapy. She earned a PhD at the University of Florida, with special study in exceptional child education, emotional disorders and speech pathology.

She holds state certification to teach in all the grades through junior college in the fields of music, speech pathology and special education. She helped develop a special education department at UCF between 1971-1981 when she joined the Orange County Public School superintendent's staff.

Between 1967 and 1970 she served as supervisor of student teachers in speech pathology, Florida State University. She also taught English and music in Orange County at an earlier date.

CORRECTION

In the April 12 special Founders' Day edition of The UCF Report, the profile of Dr. Ram Mohapatra, a nominee for 1989 Teacher of the Year from the College of Arts and Sciences, contained errors. The corrected profile appears below. The UCF Report and Office of Public Affairs regrets the errors.

Ram Mohapatra's first year at UCF was difficult. He discovered that students coming to UCF needed more preparation and remedial work to handle the material in his math courses and that they didn't have much time to study. "I found that I had to change my approach and accommodate my students," he said.

Mohapatra, educated in India, began to give more exams to identify where his students were weak. And another element he brought to his classroom was a concern for the student. "A teacher's job is to inspire, not only to instruct. You have got to have care and concern for the individual," he said.

It is for those reasons that Mohapatra has been nominated for Teacher of the Year from the Mathematics Department. A veteran of the American University in Beirut, Lebanon and the University of Alberta in Canada, Mohapatra has been at UCF since 1984. He is the author of a book and of 60 research papers.

It's nice to be important, but it's more important to be nice.

Faculty Senate reelects Joels

The newly-elected members of the Faculty Senate last week reelected Rosie Joels, Instructional Programs associate professor, to a third straight one-year term as president of the senate. She was unopposed.

Karl-Heinrich Barsch, associate professor of French and Russian, was chosen for vice chair, in an election that included Brian Rungeling, professor of Economics, as a candidate.

Senators chose Nancy P. Klintworth, assistant professor, Accounting, for secretary. Barbara Judkins, associate professor of Nursing, was also a candidate.

The election was the final business of the current academic year for the senate, except for choosing a steering committee and other standing committees. Activity will resume in the fall term.

Paul R. Millman named director of annual fund

Paul R. Millman, a graduate student at UCF three years ago, has returned from California to become UCF's director of the annual fund.

As director of annual giving at Art Center College of Design, Pasadena, Millman boosted alumni giving by 200 percent between 1986 and 1989, and increased the alumni participation rate from six percent to 27 percent.

The Council for the Advancement of Secondary Education (CASE) awarded him a bronze medal for the most improved fund raising program to a specific constituency in 1988.

Previous ties to Central Florida had a strong influence on his applying for the opening at UCF. He had acquired a home in Orlando while associate director of annual giving at Rollins College between 1983 and 1986, which he had not sold. He also found traffic congestion and air pollution in Southern California more than he had expected.

Millman is a native of West Hartford, CT, and earned his BA in mass communication from the University of Hartford.

The director of the annual fund shares an office suite with the director of alumni affairs and will report to Emma Lee Twitchell, director of University Development.

PAUL R. MILLMAN

The UCF Report

The UCF Report is published biweekly by the Department of Public Affairs, Division of University Relations, University of Central Florida, P.O. Box 25,000, Orlando, FL 32816, (407) 275-2504, in conformity with state laws, at a cost of 27.2 cents per copy. Publication of announcements and official memoranda about University policy and procedures in The UCF Report constitutes official notice to faculty and staff.

Russians at CREOL

Kirill Prokhorov (left), senior research member of Moscow's Institute of General Physics, and the institute's head of the laser-induced surface phenomena, V. I. Konov, toured UCF's research facilities last week and were pictured with M.J. Soileau, director of the Center for Research in Electro-Optics & Lasers (right). UCF's Michael Bass, vice president for research, and Soileau will spend a week in Russia in September and in May 1990 two Russians will bring samples of their solid-state work to study at UCF's laboratory facilities, as a result of a cooperative agreement co-authored by Bass and Konov.

First Founders' Day sets a precedence for excellence

April 12 was a particularly special day for four members of the UCF community when they were named University Teacher of the Year, University Distinguished Researchers of the Year and Librarian of the Year during Founders Day ceremonies that honored excellence among faculty and students.

For Haven Sweet, biologist, Narsingh Deo, holder of the Millican Chair in computer science, Allyn Stearman, anthropologist, and Phyllis Hudson, reference librarian, the recognition by their peers and the community served to complement the afternoon's activities.

Sharing the limelight with Sweet were 17 nominees for teacher honors representing UCF's five colleges. Six additional researcher nominees joined Deo and Stearman to receive recognition from the audience of hundreds in the gym. Others recognized for their service to the University included four retiring faculty, and 93 others who joined the faculty 20 or more years ago. On hand to present the faculty veterans was

charter President Charles N. Millican.

Students on the President's Honor Roll, Deans List and honor societies were recognized by Regents Chairman Joan Ruffier, who in turn was followed by special guest speaker Robert H. Atwell, president of the American Council on Education.

The quartet named top teacher, researchers and librarian were gauged on criteria that ranged from student evaluations to endorsements from students and faculty to their accomplishments in the classroom, laboratory, in the field and in the community.

Founders Day Scholars Awards were presented to current seniors with the highest grade point average who plan to graduate this spring, plus valedictorians from the 1988 spring, summer and fall graduating classes.

In addition, the first ever Celebrate Excellence student research awards were presented by W. W. "Woody" Maggard, executive director, Central Florida Research Park.

FILMS DONATED

W. L. Stackfleth of Winter Park has given UCF's ROTC detachment a film series on American air history from World War II to the Southeast Asia conflict. The chairman of the board of Photosound of Orlando Inc. presented the films to Captain Dana N. Willis for classroom presentations.

Nilda Guarda wins two-year fellowship

May 1-5 is National Nurse's Week and Jean Kijek, chair of UCF's Nursing Department, used the occasion to make an announcement about her associate chair, Nilda Guarda, who won a fellowship in a national search.

Dr. Guarda, she said, is the first nurse from Florida to receive the Robert Wood Johnson fellowship, which entitles her to spend the next two years at the University of Pennsylvania doing post-doctoral research.

Arboretum wins \$2,000 award

The UCF arboretum, built with contributions of labor, dollars and plants, earned a \$2,000 cash award in the 1989 Walt Disney Community Service awards last week.

Biology Professor Henry Whittier headed the group that put together a presentation for the awards judging in the environment and ecology category.

The 11.5-acre arboretum, designated by the President's Advisory Staff in 1983, has become a haven for environmentally protected and ecologically preserved rare and native plants that students may study and the general public may appreciate in quiet walks through the woods.

Associate Vice President Lou Trefonas, who chairs the arboretum's board of directors, accepted the award for the University at the WDW Community Service Awards luncheon on April 11.

Classified

This is a free service to full-time UCF employees. Ad forms are available at the UCF Report office, ADM 395E. A completed form is needed each time an ad runs. Deadline is Thursday before the Wednesday publication day.
